Raman
TECHNOLOGIES, INC.

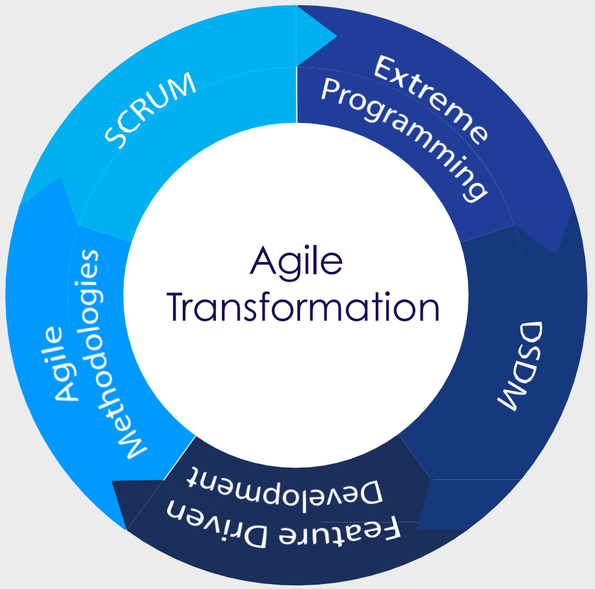
AGILE TECHNOLOGIES

Raman Technologies Inc is an agile and technology consulting company that works with organizations to improve their product delivery model. Our niche is portfolio, program, and team execution in an enterprise environment. We often step in when companies like Intel, Cisco and so call agile transformation shops fail to deliver on client expectations.

Raman Technologies Inc is able to deliver value time after time for their clients because we can assess, strategize, explain, present, train from the executive level to the team level, and then help them execute the transformation and sustain afterwards. Our knowledge is cutting edge and well respected because we speak at international conferences, provide thought leadership, publish articles, books and tools, and obtain the highest certification credentials in the industry.



Raman
TECHNOLOGIES, INC.

Our Agile Vision

Nothing less than realizing the full potential of our clients and helping them unlock their greatest asset for maximum success, we call knowledge, in this complex world we live in.

"In a time of drastic change it is the learners who inherit the future. The learned usually find themselves equipped to live in a world that no longer exists." - Eric Hoffer

Our Agile Mission

Raman Technologies Inc's mission is to empower organizations and people to be more effective, efficient, and successful in delivering their products to the marketplace. In essence - to be the catalyst and model for setting the standards for product development and creating a transparent and collaborative environment, where people are motivated to take ownership of their work and reach their potential.

Dr. Sanjeev Raman

Dr. Raman has over 15 years of Enterprise Lean|Agile transformation, coaching, and training experience. He has been a Lean|Agile coach at the team, program, and enterprise level. He has helped organizations setup an Agile center for excellence, innovate better, improve productivity, and get ISO and CMMi certified for their Agile processes. Some of his clients have included Intel, Fannie Mae, Center for Medicare and Medicaid Services, JP Morgan Chase, PayPal, Cisco, just to name a few. Dr. Raman has four academic degrees, which includes two undergraduate degrees in Biomedical Science Research and Laboratory Science and two graduate degrees in Information Technology from University of Maryland, Towson University, and George Mason University respectively. He has been on review committees for selecting speakers for the Scrum Alliance conferences, spoken at agile conferences, and published articles. Dr. Raman holds an adjunct faculty position in the College of Health and Human Services at George Mason University. Dr. Raman has published with InfoQ, Scrum Alliance, and Agile Atlas. He has also developed a cloud based and mobile Lean|Agile ALM

Aakash Srinivasan

Aakash Srinivasan is a Certified Scrum Trainer, Agile Coach, TBR – Certified Trainer and professional speaker who travels to consult Fortune 100 companies, working with enterprise management groups, executive teams and individual project teams on large scale agile transformations in addition to providing leadership coaching and other agile trainings. Aakash has trained thousands of individuals at several organizations including Lowe's, Time Warner Cable, Infosys Technologies Ltd, Freddie Mac, Fannie Mae, Capital One and mentored several enterprise management teams and individual project teams in these organizations on business efficiency, process improvements and organizational change.

Aakash frequently speaks at Agile conferences and industry events. A few recent instances include; Southern Fried Agile 2016, ADC West 2016, Heart of Agile 2016, Big Apple Scrum Day 2016, Global Scrum Gathering Orlando 2016, Innovate VA 2016, Agile 2015, Agile Indy 2015, Agile Chicago Style podcasts.

Vishesh Mathur

Vishesh Mathur has been an Enterprise Agile Coach for more than 8 years of his 17year Information Technology career and has successfully lead major Organizational Agile Transformation efforts across multiple Commercial organizations and Federal Agencies. He has previously served at Executive positions with Accenture Federal Services, Accenture LLP and Care First Blue Cross Blue Shield Association. His primary strengths are in Agile Portfolio Transformation, Lean based Organizational Process Architecture & Re-engineering, Agile Leadership & Team Coaching as well as in Strategic consulting around Agile based execution methodologies for Software development, Operational and Infrastructure teams. He currently holds an Active SPC4.0 certification with expert level knowledge of SAFe Framework.

Raman Technologies Inc Provides:

- Agile Coaching & Training
- Lean Startup Advisory

Since we understand Agile, and have helped over a dozen companies go Agile, we can effectively provide a strategy with confidence to help your organization. We will help you innovate, deliver faster, and ultimately delight your customers.

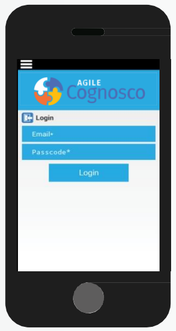
AGILE TOOLS

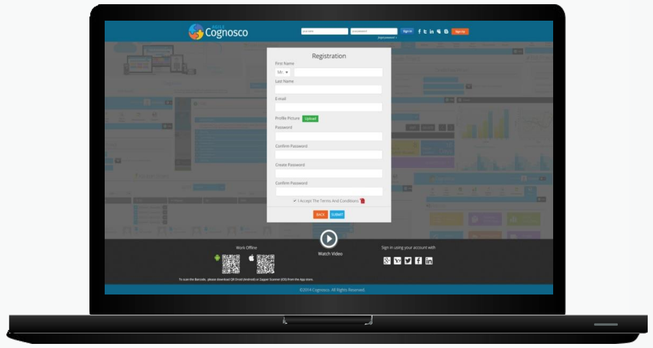
AGILE Cognosco

Raman Technologies Inc has developed an Agile Project Management tool called Cognosco (www.cognosco.us). This tool is hosted in the MS Azure Cloud and supports offline capability

(Android mobile/tablet, and iOS mobile/tablet). Our mobile/tablet apps are the most robust on the market. This tool is the ideal companion to track your Scrum projects and team's progress. It is also the most cost effective tool on the Market - $50 per project with up to 15 users per project for the Enterprise Cloud offering or FREE for the stand alone mobile/tablet app.

Cognosco supports Agile methodologies such as Lean Kanban in practice and Scrumban





Work Offline

To scan the Barcode,please download QR Droid (Android) or Zapper Scanner (iOS) from the App store.

ONLINE TRAINING

Our courses have been designed to take you through an interactive, Epic journey from the roots of Agile and Scrum to present day implementation strategies, and beyond. This well narrated, movie style course will show how to implement the Scrum constructs and the importance of the Lean | Agile mindset. The course will also cover the trending frameworks for innovation like Design Thinking and Lean Startup, and how it fits into the Scrum framework.

You will learn the roles, artifacts, and ceremonies of Scrum. Each Scrum ceremony will be simulated to illustrate the best practices. The course will also cover the trending frameworks for innovation like Design Thinking and Lean Startup, and how it fits into the Agile paradigm. At the end of the course, you can claim PDU and SEU credits from Project Management Institute and the Scrum Alliance, and review our real life Agile implementation case study.
